

FRONT END DEV – UI/UX

Cognitive Design Systems (CDS) is a tech company based in the center of Toulouse, France, the core of the aerospace industry's innovation and talent. Our company is a multicultural organization made of talented engineers brought together by a common mission, to develop the best automated CAD design solutions.

We are looking for a highly motivated and experienced Front-End Developer (UI/UX) to join our growing team, the ideal candidate would have an existing experience in Front-End development, with good programming skills.

At CDS, we believe that creativity and ingenuity are essential to evolve beyond process constraints in bringing designs to life.

Roles & Responsibilities

Front-End Development: You are part of a 10+ dev. team, leading the Front-End development asks of our current and future solutions. Thinking outside the box, you suggest new ideas, and can handle a project from start to finish.

- Ability to start, develop, maintain and take over projects such as Electron app
- Creative mindset, with a high attention to details to maximize user experience
- Key developer, leading all front-end, Design and UX/UI plans
- Ability to produce user friendly and attractive UI, for future and ongoing software
- Create wireframe and prototype on Figma and other tools
- A previous experience on webapp creation (from scratch) is required
- Team player, eager to collaborate across different function
- A previous experience with Agile methods (Sprints) would be a plus
- Polyvalent and well-organized, handling simultaneous projects and dev tasks

Skills & Qualifications

- Min 2+ years minimum experience in a similar role
- HTML5, CSS3, Tailwind
- JavaScript, Typescript (Python is a plus)
- React, Svelte (Angular is a plus)
- Node.js, Electron, Three.js, Chart.js
- Git, GitHub, Docker, Figma, Monday
